[PORTFOLIO](#) | [LINKEDIN](#) | [GITHUB](#)

## Summary

---

Full Stack & Mobile Software Engineer with 3+ years of experience engineering and scaling cross-platform mobile applications and web platforms. Expert in React Native, Next.js, TypeScript, and Node.js backend architectures. Proven track record architecting enterprise Sales Force Automation (SFA) platforms, multi-tenant build automation CLI tooling (Python), thermal printing hardware engines (Zebra ZPL/Honeywell), and custom RESTful APIs across GCC and Indian markets.

## Skills

---

**Languages & Scripting:** TypeScript, JavaScript, Python, HTML5, CSS3, SQL

**Frameworks & State:** React.js, React Native, Next.js, Node.js, Express.js, Redux Toolkit, Zustand, Tailwind CSS

**Architecture & Data:** White-Label Multi-Tenancy, Automated Build Tools, RESTful APIs, PostgreSQL, MongoDB, SQLite

**Hardware & Integrations:** Thermal Printing (Zebra ZPL, Honeywell, Bixolon), Bluetooth SDKs, Firebase (FCM), Payment Gateways, Identity Verification

**DevOps & Mobile Deployment:** iOS App Store Connect, Google Play Console, EAS Build, VPS Management, Git, CI/CD

## Experience

---

### Software Engineer, WINIT Solutions

Aug 2025 – Present

#### Enterprise SFA & FMCG Platforms (GCC Region)

- Engineer high-performance Next.js and React Native applications for enterprise FMCG clients, including Choithrams, Zad Holding, and Dubai Refreshment (PepsiCo distributor).
- Architected an automated Python white-labeling build CLI, streamlining multi-tenant deployments by dynamically switching package names, assets, Firebase configs, and localized API endpoints per target.
- Built a dynamic web portal editor that generates structured JSON layouts for mobile print engines, enabling server-driven receipt and invoice template updates across field devices.
- Integrated cross-platform mobile thermal printing protocols (Zebra ZPL, Honeywell, Bixolon) via Bluetooth and Wi-Fi for real-time invoice generation.
- Accelerated feature delivery cycles by 40% by engineering structured LLM-driven development workflows (Cursor, Claude Code), custom prompt templates, and component design patterns.
- Modularize frontend architecture using TypeScript and Zustand, reducing state re-render overhead and optimizing performance for low-spec field devices.
- Design relational and offline-first database schemas using PostgreSQL and SQLite to guarantee fault-tolerant transaction syncing for sales reps.
- **Tech Stack:** Next.js, React Native, TypeScript, Python (Build Automation), Zustand, Node.js, PostgreSQL, SQLite, Thermal Printing (ZPL)

### Frontend Developer, Aptapace Innovative Technologies – Onsite

Oct 2024 – Aug 2025

#### Service-Based Client Products (1T4, Save Farmers, Book Your Appointment)

- Led full-lifecycle development, iOS App Store, and Google Play Store releases of multiple cross-platform React Native applications using EAS Build pipelines.
- Integrated identity verification systems alongside high-volume payment gateways (Razorpay, BuildEX, Airpay, Cashfree) to ensure fault-tolerant checkout flows.
- Architected responsive web dashboards in React and Tailwind CSS for real-time monitoring of transactions, business metrics, and operational logs.
- Developed custom backend microservices and RESTful API endpoints using Node.js and Express to streamline data processing between mobile clients and database clusters.
- **Tech Stack:** React, React Native, TypeScript, Node.js, Express, Tailwind CSS, MongoDB, Firebase

**Junior Software Developer**, TechTok4u Pvt Ltd – Remote

Jun 2023 – May 2024

**Instil – Digital School Management App**

- Built and deployed a full-stack digital school management platform featuring an administrative web portal in React and mobile clients in React Native.
- Engineered secure backend RESTful APIs using Node.js, Express, and MongoDB, enforcing role-based authentication and operational data security.
- Configured and maintained Linux-based Virtual Private Server (VPS) environments for production API hosting, establishing reliable uptime performance.
- **Tech Stack:** React, React Native, Node.js, Express.js, MongoDB, TypeScript, Linux VPS

**Education**

**Jaya Prakash Narayana College of Engineering**, B.Tech in Computer Science Engineering

July 2019 – July 2023
